Important Health Warning: Photosensitive Seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people with no history of seizures or epilepsy may have an undiagnosed condition that can cause "photosensitive epileptic seizures" while watching video games. Symptoms can include light-headedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, momentary loss of awareness, and loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects. **Immediately stop playing and consult a doctor if you experience any of these symptoms.** Parents, watch for or ask children about these symptoms—children and teenagers are more likely to experience these seizures. The risk may be reduced by being farther from the screen; using a smaller screen; playing in a well-lit room, and not playing when drowsy or fatigued. If you or any relatives have a history of seizures or epilepsy, consult a doctor before playing.

INSTALLATION

Insert the DVD into the drive. If the launcher does not open right click the DVD drive, choose Open, then browse the directory and double click the Setup.exe file.

Please choose which language to install the game in. This can be changed later by right clicking on DiRT®4™ from the library section of the Steam Client, choosing Properties and selecting the Language tab.

Select Install DiRT 4 from the Launcher. You must accept the end user license agreement to progress. Administration rights are needed to install the game.

Your machine will be checked to see if the Steam Client has already been installed. If so you will be presented with the login screen, otherwise the Steam Client will be installed.

You must log into the Steam Client to install the game. If you do not already have a Steam account, you can create one by choosing the Create New Account option and following the on-screen prompts. Once logged in please insert your activation code when prompted. A window will pop up displaying details about the game and will ask you to accept it. Choose the OK option to start installing the game. If the window does not appear, please launch setup.exe again from the first step whilst you are logged into Steam.

Wait for the game to install. The game will also automatically install any available patches. Once complete, double click the DiRT 4 game from the Library within the Steam Client. Steam will finish the installation and launch the game.

DISCIPLINES

RALLY

In Rally, competitors race one at a time down a section of road called a Stage. Stages vary in length and can be bumpy, twisty and have multiple surfaces ranging from gravel to asphalt and snow. To be successful you'll need to listen to your Co Driver and maintain your nerve to push the car to the edge of its performance. An event is made up of one or more stages with service intervals to repair your car along the way. The fastest combined time across the stages wins the Event.

RALLYCROSS

Rallycross features high pressure, high adrenaline Circuit races held in motorsport arenas in front of large crowds. You need to take a Joker lap at least once per race, and you have a Spotter who will help you decide when to take it so that you can come out on top. Rallycross events are composed of Qualifying heats, Semi Finals and Finals. 15 opponents stand between you and the top step of the podium.

LANDRUSH

Landrush events are all about the spectacle of 8 high-powered vehicles thundering around short dirt courses in the USA & Mexico. The courses are littered with hazards that guarantee spectacular action, such as breathtaking jumps, sweeping banked corners and suspension-shaking moguls. Events are made up of semi finals and finals; the top 4 from the semis feature in the A-final, whereas the bottom 4 enter the B-Final.

JOYRIDE

Joyride allows you to show off your driving skills in Smash Attack and Time Attack challenges, designed to test every aspect of car control whilst burning as much rubber as possible. Smash Attack requires you to smash as many blocks as you can within the time limit, whereas Time Attack is all about setting the fastest time on a course littered with bonus and penalty markers. Identifying the best route, displaying masterful car control and deploying an almighty amount of handbrake are the key to winning gold medals in these events.

DiRT ACADEMY

As well as being a great place to practice and test cars, the DiRT Academy allows you to learn crucial driving techniques and scrub up on the key concepts of Rally, Rallycross and Landrush. Lessons are split into three categories – Text, Video and Practical. Text and Video lessons run you through the theory, and Practical lessons strap you into a car with an Instructor for live demonstrations and hands-on experience.

CO DRIVER NOTES

During Rally events your Co Driver calls out a description of the road ahead. Icons appear on screen to support these calls.
Typical notes include…

- Corner Description: for example 'Left Six'. The number indicates the severity of the corner, from 6 (fastest) to 1 (slowest). 'Square', 'Hairpins' and 'Acute' are also called when corners are 90 degrees or tighter.

- Distances: for example 'Eighty'. The distance in meters to the next corner or hazard. Where corners are close to each other the notes are strung together using the terms 'into' or 'and'.

- Hazard: for example 'Over Crest' or 'Narrows'. 'Don't Cut' means a potentially hidden danger lies on the inside of the corner.

RACING WHEEL

DiRT 4 supports a wide range of wheels, pedals and gear shifters from a number of different manufacturers. For a full list of supported devices visit www.DiRT4game.com
